### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Election/Restrictions***

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-27 and 43, drawn to an isolated nucleic acid, vector/plasmid comprising it, plant and plant/cell transformation method.

Group II, claim(s) 28-37, drawn to a process for isolating nucleic acid using primers, an oligonucleotide.

Group III, claim(s) 38-40, drawn to a diagnostic kit and a method of using said kit for detecting presence/absence of a DNA.

Group IV, claim(s) 41-42, drawn to a polypeptide and a method of using said polypeptide.

The inventions listed as Groups I-IV do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the invention of claim 1 is taught in the prior art, therefore, do not constitute a contribution of the prior art. For example, the nucleic acid sequence having at least about 60% identity to at about 50 contiguous bases of SEQ ID NO: 11 of claim 1 is obvious over ORI et al (EUPHYTICA 79 (3). 1994. 281-284). ORI et al a genomic search for the gene conferring resistance to fusarium wilt in tomato" see the whole document.

Furthermore, the special technical feature of Group I is considered to be an isolated nucleic acid, vector/plasmid comprising it, plant and plant/cell transformation method.

The special technical feature of Group I is considered to be a process for isolating nucleic acid using primers, and an oligonucleotide used in the process.

Art Unit: 1638

The special technical feature of Group I is considered to be a diagnostic kit and a method of using said kit for detecting presence/absence of a DNA.

The special technical feature of Group I is considered to be a polypeptide and a method of using said polypeptide.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
